Tips and Tricks:

- If you are running some of the longer legs (Leg 4, Leg 9, Leg 10, Leg 11), you might want to adjust this to more mileage! If you are already running a bit, you can also adjust to run a bit more.
- All the days are adjustable to your schedule! Remember this is just guidance to help YOU get ready for the RTO.
- Don't underestimate the power of the run/walk. Moving forward is still progress even though it is taken at a walking speed. Make your goal for the next run to walk fewer times!
- Practice running in the dark at least once during your training block. Go with a friend, do a RTO organized practice leg, or find a route you feel comfortable doing this on. Bonus points if you do it on a two runs in one day training session!
- Reno Running Company Run Club speed work on Wednesdays can be a substitute for the speed sessions mentioned above. A great group for all ability levels!
- Utilize group running throughout the week and follow these groups on social media platforms:
 - Reno Running Company Store Runs
 - Silver State Striders
 - Mikkeller Run Club
 - Magnum Project

- RTO practice runs
- Last of all, have fun!!!
